

OVERVIEW OF APPLICATION REQUIREMENTS*

Application requirements for existing stocks use of XtendiMax® herbicide with VaporGrip® Technology, which has been classified as a restricted use pesticide, are intended to help maximize weed control with on-target applications and minimize the potential for off-target movement.

THIS SUMMARY IS NOT A SUBSTITUTE FOR READING AND FOLLOWING ALL PRODUCT LABELING.

MANDATORY TRAINING

Prior to using, user **MUST** complete dicamba-specific training for certification.

RECORD KEEPING

Records **MUST** be created within 72 hours of every application. Records **MUST** be kept for two years.

APPLICATION

VaporGrip® Xtra AGENT

REQUIRED ADJUVANTS For EVERY application, an approved volatility reduction adjuvant **MUST** be included in the spray solution. An approved drift reduction adjuvant **MUST** also be included unless otherwise indicated on the website.

APPLICATION RATE AND TIMING

Apply **ONLY** 22 fluid ounces per acre for any single pre-emergent (i.e., burndown, preplant, at planting, up to crop emergence) or in-crop application in:

- Cotton with XtendFlex® Technology up to and including July 30.
- Soybeans with Roundup Ready 2 Xtend® Technology or XtendFlex Technology up to and including June 30. Applications occurring after R1 are prohibited as crop response may occur.
- Refer to Table 1 of the EPA's Existing Stocks Order for end dates for use by state.
- Some states may have additional restrictions. Please check [XtendiMaxApplicationRequirements.com](https://www.XtendiMaxApplicationRequirements.com).
- The user must check [XtendiMaxApplicationRequirements.com](https://www.XtendiMaxApplicationRequirements.com) no more than seven days before application of this product for additional labeling, including state restrictions.

SPRAY VOLUME Apply in a minimum of 15 gallons of spray solution per acre.

TANK MIXING Use only **approved** tank-mix partners found on the XtendiMax herbicide tank-mix website. **DO NOT TANK-MIX WITH AMS.** Please refer to all product labels to determine mix order or perform a mix compatibility test.

APPLICATION EQUIPMENT

SPRAY SYSTEM EQUIPMENT CLEANOUT Ensure entire sprayer system is properly cleaned before **AND** after application using a triple-rinse procedure.

NOZZLES Use only **approved** nozzles within specified pressures as found on the website.

SPRAY BOOM HEIGHT **DO NOT** exceed a boom height of 24 inches above target pest or crop canopy.

GROUND SPEED **DO NOT** exceed 15 mph.

ENVIRONMENTAL CONDITIONS

WIND SPEED Apply when wind speed, measured at boom height, is 3-10 mph.

INVERSIONS DO NOT SPRAY during an inversion. Only spray between one hour after sunrise and two hours before sunset.

RAINFALL Apply **ONLY** if rain that may exceed soil field capacity and result in soil runoff is **NOT** expected in the next 48 hours.

ENDANGERED SPECIES

Consult Endangered Species Protection Bulletins for Pesticide Use Limitation Area restrictions obtained from EPA's Bulletins Live! Two (www.epa.gov/endangered-species/bulletins-live-two-view-bulletins). Obtain bulletins no more than six months before using these products.

DOWNWIND REQUIREMENTS

ADJACENT SENSITIVE CROPS AND CERTAIN PLANTS **DO NOT SPRAY** when wind is blowing toward adjacent sensitive crops and/or certain plants as defined on the label.

DOWNWIND After determining no adjacent sensitive crops and/or certain plants are downwind, always maintain a downwind buffer.

OPTIONAL USE OF DRIFT REDUCTION TECHNOLOGY (DRT)

Use of **QUALIFIED** hooded/shielded broadcast sprayers in dicamba-tolerant soybeans results in a reduced downwind buffer distance of 110 feet in **non-PULAs**. See the XtendiMax herbicide website for a list of qualified DRT.

FOR INCIDENCE OF NONPERFORMANCE OR OFF-TARGET MOVEMENT OR FOR QUESTIONS REGARDING BUFFER REQUIREMENTS OR SENSITIVE CROP REGISTRIES, CALL 1-844-RRXTEND.

FOR BEST RESULTS, SPRAY WEEDS THAT ARE LESS THAN 4 INCHES TALL.

*Check with your local product dealer or representative or U.S. EPA and your state pesticide regulatory agency for product registration status and additional restrictions in your state.
 No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted, and no dicamba formulations are currently registered for such use in the 2024 season. Please follow <https://www.roundupreadyxtend.com/pages/xtendimax-updates.aspx> for status updates. Based on court ruling and EPA Existing Stocks Order on XtendiMax® herbicide registration, Bayer has stopped its sale and distribution of XtendiMax® herbicide. Visit our XtendiMax herbicide updates page to learn the latest: www.roundupreadyxtend.com/xtendimaxupdates. *Low-volatility dicamba products subject to the ruling include XtendiMax® herbicide with VaporGrip® Technology, Engenia® herbicide and Tavium® Plus VaporGrip® Technology herbicide. Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. XtendiMax® herbicide with VaporGrip® Technology is a restricted use pesticide and must be used with VaporGrip® Xtra Agent (or an equivalent volatility reduction adjuvant). For approved tank-mix products (including VRAs and DRAs), nozzles and other important label information visit [XtendiMaxApplicationRequirements.com](https://www.XtendiMaxApplicationRequirements.com). Applicators must check XtendiMaxApplicationRequirements.com no more than 7 days before application of this product for additional labeling, including state restrictions. Where applicable, users must comply with additional requirements found on this website. **ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. **NOT ALL** formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. **NOT ALL** formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. **ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION.** Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Plants that are not tolerant to glyphosate, dicamba, and/or glufosinate may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs. XtendiMax® is a restricted use pesticide. Not all products are registered for use in all states and may be subject to use restrictions. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Check with your local dealer or representative for the product registration status in your state. Respect the Refuge and Cotton Design®.
