OVERVIEW OF APPLICATION REQUIREMENTS*

Application requirements for existing stocks use of XtendiMax® herbicide with VaporGrip® Technology, which has been classified as a restricted use pesticide, are intended to help maximize weed control with on-target applications and minimize the potential for off-target movement.

THIS SUMMARY IS NOT A SUBSTITUTE FOR READING AND FOLLOWING ALL PRODUCT LABELING.

MANDATORY TRAINING
Prior to using, user MUST complete dicamba-specific training for certification.

RECORD KEEPING
Records MUST be created within 72 hours of every application. Records MUST be kept for two years.

APPLICATION

APPLICATION RATE AND TIMING
Apply ONLY 22 fluid ounces per acre for any single pre-emergent (i.e., burndown, preplant, at planting, up to crop emergence) or in-crop application in:
- Cotton with XtendFlex® Technology up to and including July 30.
- Soybeans with Roundup Ready 2 Xtend® Technology or XtendFlex Technology up to and including June 30.

APPLICATION EQUIPMENT

SPRAY SYSTEM EQUIPMENT CLEANOUT
Ensure entire sprayer system is properly cleaned before AND after application using a triple-rinse procedure.

NOZZLES
Use only approved nozzles within specified pressures as found on the website.

SPRAY BOOM HEIGHT DO NOT exceed a boom height of 24 inches above target pest or crop canopy.

GROUND SPEED DO NOT exceed 15 mph.

ENVIRONMENTAL CONDITIONS

WIND SPEED
Apply when wind speed, measured at boom height, is 3-10 mph.

INVERSIONS
DO NOT SPRAY during an inversion. Only spray between one hour after sunrise and two hours before sunset.

RAINFALL
Apply ONLY if rain that may exceed soil field capacity and result in soil runoff is NOT expected in the next 48 hours.

ENDANGERED SPECIES

Consult Endangered Species Protection Bulletins for Pesticide Use Limitation Area restrictions obtained from EPA’s Bulletins Live! Two (www.epa.gov/endangered-species/bulletins-live-two-view-bulletins). Obtain bulletins no more than six months before using these products.

DOWNWIND REQUIREMENTS

If use is made by or on land within 300 feet of Endangered Species, the use is prohibited unless specifically approved by the U.S. Fish and Wildlife Service.

OPTIONAL USE OF DRIFT REDUCTION TECHNOLOGY (DRT)

Use of QUALIFIED hooded/shielded broadcast sprayers in dicamba-tolerant soybeans results in a reduced downwind buffer distance of 110 feet in non-PULAs. See the XtendiMax herbicide website for a list of qualified DRT.

FOR BEST RESULTS, SPRAY WEEDS THAT ARE LESS THAN 4 INCHES TALL.

*Check with your local product dealer or representative of U.S. EPA and your state pesticide regulatory agency for product registration status and additional restrictions in your state.

DOWNSIDE
After determining no adjacent sensitive crops and/or certain plants are downwind, always maintain a downwind buffer.
