

THE SOYBEAN FARMERS TRUST TO PERFORM

ROUNDUP READY 2
Xtend
SOYBEANS

Elite Genetics. Proven Results.

Roundup Ready 2 Xtend[®] soybeans are built on the high-yielding Roundup Ready 2 Yield[®] Technology that farmers trust. See how advanced weed control and proven yield results provide farmers with the results they need.

WEED CONTROL

- **Control 311 weeds¹** with tolerance to both dicamba and glyphosate.

- With XtendiMax[®] herbicide with VaporGrip[®] Technology, a restricted use pesticide, up to **14 days of soil activity** on certain small-seeded broadleaf weeds.²

YIELD

- **3.5 bu/A advantage** on average vs. Enlist[™] Weed Control System in herbicide system trials when used as part of the Roundup Ready[®] Xtend Crop System.³

Here's what farmers are saying...

“

This is my second year with the Roundup Ready 2 Xtend soybeans. In the past two years, we've used the XtendiMax[®] herbicide with VaporGrip[®] Technology post and are getting extremely clean fields - even neighbors are starting to notice.

Ryan H., Chanut, KS

“

I believe that Bayer has put their best soybeans into this system. You get a yield bump with Roundup Ready 2 Xtend soybeans and, also, you control your resistant weeds.

Sam P., Galesburg, IL

¹ Based on approved EPA herbicide labels for the herbicides recommended for use in each system as of 10/28/2020

² Results may vary, depending on rainfall and soil type. Always use dicamba with residual herbicides in pre-emergence and postemergence applications that have different, effective sites of action, along with other Diversified Weed Management Practices.

³ 2020 Farmer Managed Soybean System Trials (57 locations in 2020 reporting data located with 5-IA, 4-IL, 8-IN, 4-KS, 1-KY, 3-MI, 9-MN, 2-MO, 4-ND, 5-NE, 4-OH, 2-PA, 6-SD). Significant at $P \leq 0.05$ LSD at 1.1 Bu/A as of 10/25/2020. Roundup Ready[®] Xtend Crop System data = Roundup Ready 2 Xtend[®] soybeans with a farmer-selected weed control program that may include dicamba, glyphosate and various residual herbicides. Enlist[™] Weed Control System data = Enlist E3[®] soybeans with a farmer-selected weed control program that may include glyphosate, Enlist One[®] herbicide, Liberty[®] 280 SL herbicide and various residual herbicides.

Bayer is a member of Excellence Through Stewardship[®] (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship[®] is a registered trademark of Excellence Through Stewardship.

XtendiMax[®] herbicide with VaporGrip[®] Technology is part of the Roundup Ready[®] Xtend Crop System, is a restricted use pesticide and must be used with VaporGrip[®] Xtra Agent (or an equivalent vapor reducing agent). For approved tank-mix products (including VRAs and DRAs), nozzles and other important label information visit XtendiMaxApplicationRequirements.com.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend[®] soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend[®] soybeans or products with XtendFlex[®] Technology.

Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Roundup Ready 2 Xtend[®] soybeans contain genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

XtendiMax[®] is a restricted use pesticide. Not all products are registered in all states and may be subject to use restrictions. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Check with your local dealer or representative for the product registration status in your state.
